How do I determine my current version of Citrix Receiver?

There are several options to check your version of Citrix Receiver.

**Option 1:** Under the System Tray, find the Citrix Receiver icon > right-click the icon and choose Advanced Preferences. On the Advanced Preferences window, note the version:
Option 2: Navigate to Control Panel > Programs and Features. Find Citrix Receiver in the program list and note the version number listed. Then, use the Citrix Receiver Quick Reference Version List to determine the full version of Citrix Receiver. (NOTE: Versions 14.x in Control Panel correlate to Citrix Receiver version 4.x).
